Description :

Prsentation de l'diteurHuman Nature After Darwin is an original investigation of the implications of Darwinism for our understanding of ourselves and our situation. It casts new light on current Darwinian controversies, also providing an introduction to philosophical reasoning and a range of philosophical problems.Janet Radcliffe Richards claims that many current battles about Darwinism are based on mistaken assumptions about the implications of the rival views. Her analysis of these implications provides a much-needed guide to the fundamentals of Darwinism and the so-called Darwin wars, as well as providing a set of philosophical techniques relevant to wide areas of moral and political debate.The lucid presentation makes the book an ideal introduction to both philosophy and Darwinism as well as a substantive contribution to topics of intense current controversy. It will be of interest to students of philosophy, science and the social

sciences, and critical thinking. Presentation de l'auteur Human Nature After Darwin is an original investigation of the implications of Darwinism for our understanding of ourselves and our situation. It casts new light on current Darwinian controversies, also providing an introduction to philosophical reasoning and a range of philosophical problems. Janet Radcliffe Richards claims that many current battles about Darwinism are based on mistaken assumptions about the implications of the rival views. Her analysis of these implications provides a much-needed guide to the fundamentals of Darwinism and the so-called Darwin wars, as well as providing a set of philosophical techniques relevant to wide areas of moral and political debate. The lucid presentation makes the book an ideal introduction to both philosophy and Darwinism as well as a substantive contribution to topics of intense current controversy. It will be of interest to students of philosophy, science and the social sciences, and critical thinking. Biographie de l'auteur Janet Radcliffe Richards is Reader in Bioethics and Director of the Centre for Bioethics at University College London. she was formerly lecturer in philosophy at the Open University and is the author of the acclaimed book The Sceptical Feminist.
